To Whom It May Concern:

Thank you for your interest in Tektronix products and their compliance to REACH¹. Tektronix products are classified as articles which are not intended to release substances under normal or foreseeable conditions of use. As such, we are not directly required to register the materials used in their manufacture. Tektronix has a duty to communicate to our customers the presence of SVHCs greater than 0.1% by weight of articles.

Tektronix has reviewed its products for the presence of the one hundred eighty-one (181) SVHC substances on the EU SVHC Candidate List as of 15 January 2018.

Based on our engineering evaluation and supplier declarations we have determined to the best of our knowledge that the SVHC candidates below may be present above 0.1% by weight of articles (as defined by Court of Justice of the European Union Case C-106/14) in the indicated applications:
