This *Read This First* document informs you of the following caution about using the Operating System software CD that is provided with the PQA300 Picture Quality Analysis system:

CAUTION. *If it is necessary to reinstall the PQA300 operating system software, use only the CD that was shipped with your PQA300 system. Applying the software on the CD to an instrument with a different controller board may damage the software on that instrument. (Tektronix part number 063-3651-XX has been created to support the DTI LBC8926A controller. The previous controller, LBC8525, was supported by Tektronix disc part number 063-3484-XX.) To find out which controller is installed in your instrument, observe the display as the system boots; the BIOS displays the version of controller board installed.*
