

YOU SPOKE. WE LISTENED.

Have it all with the new Tektronix Oscilloscope.

STRAIGHT TO THE POINT

Remember the good old days? The days when you didn't need a cell phone, GPS or social media? We remember them too! Our engineers searched deep and brought back a piece of your childhood. Our new Tektronix oscilloscope comes complete with a side mounted manual pencil sharpener and three #2 pencils!

LIMITLESS POSSIBILITIES

- Includes VR headset to surf your wavelength!
- Precise wormhole measurements for time travel accuracy.
- Quick shrink function allows for pocket storage on-the-go!
- Mind-activation (better than voice activation)

COOLER THAN THE COMPETITION

At Tektronix, we have hundreds of hard working engineers sitting in front of test and measurement equipment each day. They get tired, dehydrated, and consistently say the same thing. "We want our oscilloscope to double as a cooler". They asked and we answered. Our newest oscilloscope is refreshing in more ways than one. Crack open the shell, put your favorite beverages on ice and head to the park. We'll see you there!
