

# CALIBRATION

## ONE-STOP SHOP FOR CALIBRATION PROGRAM MANAGEMENT

Tektronix can manage 100% of your calibrations and repairs, simplifying your calibration management program and reducing expenses.

### Complete Calibration Management

Tektronix provides the industry's widest breadth of calibration capabilities on 140,000 products from more than 9,000 manufacturers. And if we can't service your instrument, our vast list of authorized service providers can. We're your one-stop shop that will handle all the logistics!

### Global Reach with Local Presence

Tektronix has the most extensive global network of resources, with more than 100 points of service and 1,100 highly trained experts world-wide. Our unmatched suite of capabilities and services are available locally to most of the world's research and manufacturing centers.

### Multiple Onsite and Service Delivery Options

In addition to our global service center network, we can provide periodic or permanent onsite services at your location. Tektronix technicians come to you to minimize downtime and work within your schedules. With our service centers, onsite options and authorized service providers, Tektronix is your best single source for all calibration needs.

### Enabled by CalWeb®

CalWeb helps you to easily manage asset pools and calibration programs.

- Get an organizational view of your instruments' compliance status and service history
- Quick access to calibration certificates
- Out-of-tolerance monitoring
- Flexible, customized reporting
- Compliant with the FDA's 21 CFR Part 11 electronic data management regulations
- Multi-layered security
- Cloud-based access via PC or mobile

"Since we selected Tektronix as our service provider we have realized a 40% increase in our test equipment availability, improving production efficiency and significantly reducing redundant capital expenditures with no audit findings"  
- Aerospace customer
