

Bringing the Factory to You

Protect your investment, limit unplanned downtime and maximize ROI by letting us bring our technical expertise and world-class services to you!

Minimize impact on your operations. Reduce downtime.

What is the cost of downtime to you? Lost productivity, lost development time and added labor costs can negatively affect your bottom line.

With an On-Site Calibration Services plan from Tektronix, we maximize uptime and reduce costs by bringing the factory to you. Our highly trained Customer Service Engineers will work with your team to plan, manage and execute a comprehensive calibration program that doesn't impact demanding design and production schedules.

Whether your test equipment is in a mission-critical environment, you are designing a next-generation product, or monitoring a live video feed, we understand how disruptive it is when your instruments are not available. With our On-Site OEM Calibration Services, you can count on ready access to instruments that are operating at the highest degree of accuracy and efficiency.

Keep Your Equipment Running Like New

Factory Certified Calibration Programs include:

- Verification of specifications
- Updates to instrument firmware
- Installation of reliability and safety updates*
- Traceability to national metrology institutes
- Certificate of Traceable Calibration
- Maintenance of traceability records
- Availability of before and after test data

Tektronix®

On-site Calibration Services Bringing The Factory To You

Compliance

Your instruments can be calibrated on-site using both accredited and fully traceable calibration standards. Tektronix personnel, facilities, and equipment are certified and/or accredited, where applicable, to the following standards:

ISO/IEC 17025:2005

ANSI/NCSL Z540.1-1994

ISO9001:2015

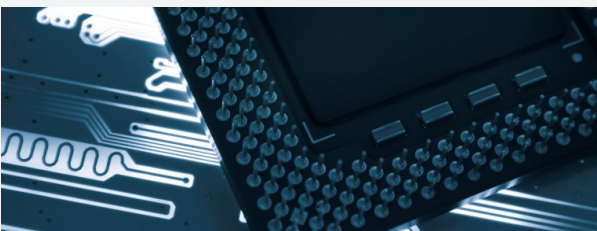

From our customers

Our on-site calibration services help customers be more productive and efficient. Here's what they have to say.

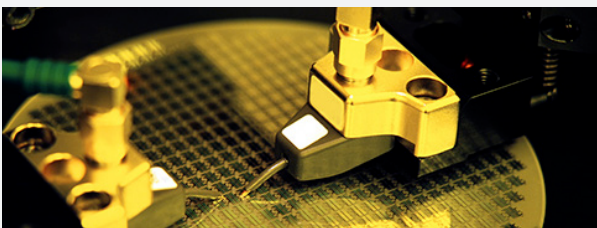

"Tektronix did such a great job during an on-site calibration event that I asked if they could possibly do non-Tektronix equipment. Their quote was very competitive so now I only have to make one phone call to have all my instruments calibrated at the same time."

-Aerospace / Defense Contractor

"I needed an accredited calibration done on-site for my Keithley instruments. Tektronix quality and adherence to ISO-17025 standards allowed me to comply with our internal auditing requirements."

-Asia Memory Chip Manufacturer

"Maintaining our parametric test systems is critical to our sophisticated production environment. Tektronix/Keithley allows us to pre-schedule on-site calibration support to ensure minimum downtime."

-International Semiconductor Fabricator
