To Whom It May Concern:

Thank you for your interest in Tektronix products and their compliance to REACH¹. Tektronix products are classified as articles which are not intended to release substances under normal or foreseeable conditions of use. As such, we are not directly required to register the materials used in their manufacture. Tektronix has a duty to communicate to our customers the presence of SVHCs in articles at concentrations greater than 0.1% w/w.

Tektronix is actively engaged with its supply chain in order to review its products for the possible presence of the **224** SVHC substances on the EU SVHC Candidate List as of **10 June 2022**.

Based on our engineering evaluation and supplier declarations received to date, we have determined to the best of our knowledge that the products we sell into the EU are compliant to relevant restrictions on substances listed in Annex XVII of REACH. Additionally, we are notifying you that the SVHC candidates below may be present above 0.1% by weight of article (as defined by Court of Justice of the European Union Case C-106/14). Tektronix affected products are registered in the EU SCIP database for information on *Substances of Concern In articles as such or in complex objects (Products)* established under the Waste Framework Directive. Product specific SCIP Notification numbers can be provided upon request.
