To Whom It May Concern:

Thank you for your interest in Tektronix products and their compliance to REACH¹. Tektronix products are classified as articles which are not intended to release substances under normal or foreseeable conditions of use. As such, we are not directly required to register the materials used in their manufacture. Tektronix has a duty to communicate to our customers the presence of SVHCs greater than 0.1% by weight of articles.

Tektronix is actively engaged with its supply chain in order to review its products for the possible presence of the **two hundred and five (205)** SVHC substances on the EU SVHC Candidate List as of **16 January 2020**.

Based on our engineering evaluation and supplier declarations received to date, we have determined to the best of our knowledge that the products we sell into the EU are compliant to relevant restrictions on substances listed in Annex XVII of REACH. Additionally, we are notifying you that the SVHC candidates below may be present above 0.1% by weight of articles (as defined by Court of Justice of the European Union Case C-106/14) in the indicated applications:
