## Specifications

### SPECIFICATION CONDITIONS

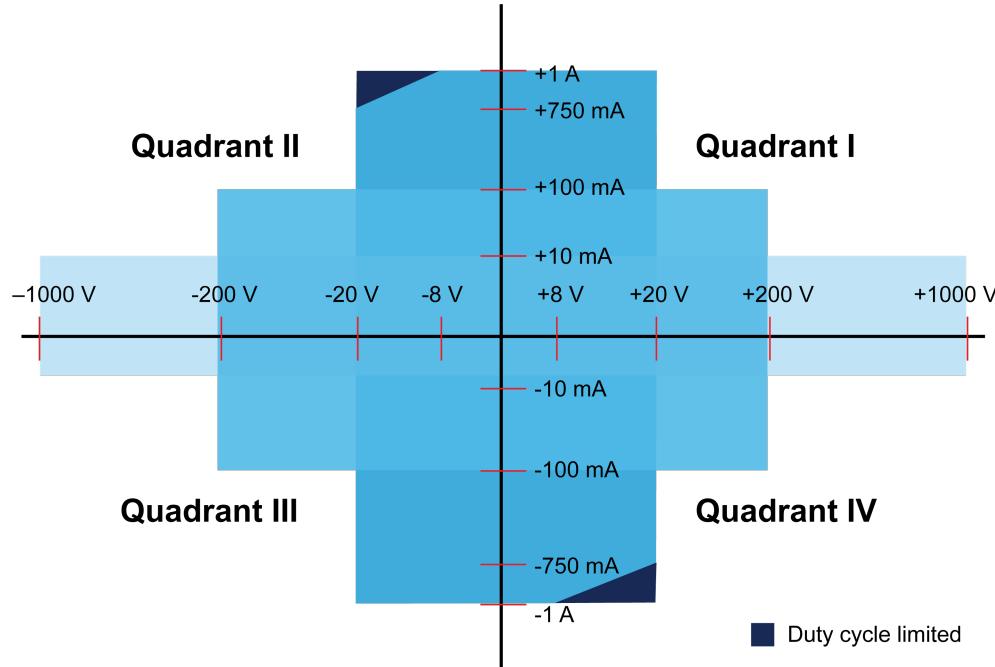

This document contains specifications and supplemental information for the Model 2470 High Voltage SourceMeter® instrument. Specifications are the standards against which the 2470 is tested. Upon leaving the factory, the 2470 meets these specifications. Supplemental and typical values are nonwarranted, apply at 23 °C, and are provided solely as useful information.

Source and measurement accuracies are specified at the Model 2470 terminals with A/D autozero enabled.

Calibration period: One year.
