Application software download and install instructions

This document describes how to download and install the TekExpress Thunderbolt Transmitter Automation Solution software.

Software	Software version number	Description	Keyword for search
TBT-TX	V1.0.0 and greater	Thunderbolt Transmitter Compliance Solution	TBT-TX

Download and install

Use the following instructions to download and install TekExpress-based software updates. TekExpress applications require a purchased license to operate.

1. Go to **<http://www.tektronix.com/software>**.
2. Enter **TBT-TX** in the search field.
3. Download the latest version of the software. Place the downloaded file on the instrument on which to install the application.
4. Close the TekScope application and verify that all prerequisite applications are installed on the instrument.
5. Double-click the installation file to install the software. Follow the on-screen instructions.
6. Restart the instrument after the install is done. You must restart the instrument for the software to function correctly.
