Description

The Keithley Instruments Model 8020 Interlock Expansion Cable is approximately 120 cm (47.24 in.).

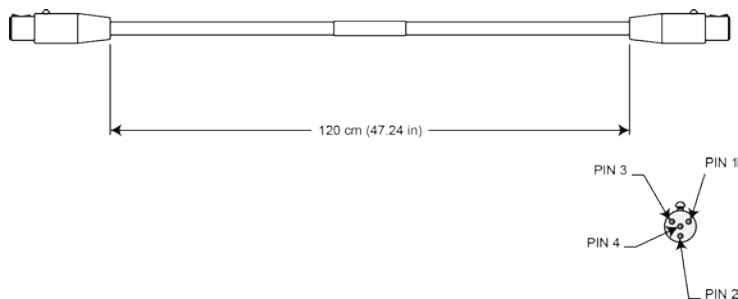

This cable is used to daisy chain (wire together in sequence) one of the Model 8020 interlocks to another Model 8020. Once daisy-chained, the system interlock and one of the Model 8020 cover interlocks will enable or disable the interlock feature of all connected instruments. For more information about interlocks, refer to the Model 8020 High Power Interface Panel User's Manual.
