Tektronix

Kit Contents

- Instruction sheet
- Copper spacer (1)
- Heat sink standoffs (2)
- Screws (4)
- Top and bottom brackets (2 ea)

Tools Required

- Phillips (P1) screwdriver to tighten the screws
- Optional: A torque wrench helps to ensure reliable connections by meeting the nominal torque values. When attaching screws use 8 in-lbs of torque.

Overview

Use this instruction sheet to install the heat sink hardware. To install the probe head, use the installation instructions in the *TMSST2 LGA771 and 775 Socket Hardware Support Manual* (Tektronix part number 071-1665-XX).

Procedure

You need to power off the target system and remove the heatsink and power pod before installing the brackets.

NOTE. Use as many screws as possible to attach the brackets.
