100 Ω SMA to SMA Coaxial Cables

Description

The Keithley Instruments CA-446A and CA-447B cables are 100 Ω SMA to SMA coaxial cables with strain reliefs. These cables connect instruments and switching products that have SMA jacks to fixtures and instruments with SMA jacks.

These cables are commonly used with the Keithley Instruments Model 4210-CVU Capacitance-Voltage Unit (CVU).

The item shipped may vary from the item in the picture.

Dimensions

Part number	Length
CA-446A	3 m
CA-447B	1.5 m

Electrical characteristics

Impedance: 100 Ω

Maximum voltage: 50 V_{RMS}

Maximum current: 100 mA
