

TekExpress® BRR read this first

Application software download and install instructions

This document describes how to download and install the TekExpress BroadR-Reach Automated Compliance Solution software.

Software	Software version number	Description	Keyword for search
BRR	v1.0.0 and above	BroadR-Reach Automated Compliance Solution	BroadR-Reach

Download and install

Use the following instructions to download and install TekExpress-based software updates. TekExpress applications require a purchased license to operate.

1. Go to **<http://www.tek.com/downloads>**.
2. Select **Software** from the SELECT DOWNLOAD TYPE drop down menu.
3. Enter **BroadR-Reach** in the MODEL or KEYWORD search field.
4. Download the latest version of the software. Place the downloaded file on the instrument on which to install the application.
5. Close the TekScope application.
6. Double-click the installation file to install the software. Follow the on-screen instructions.
7. Restart the instrument after the install is done. You must restart the instrument for the software to function correctly.
