GENERAL INFORMATION

SUPPORTED MODELS

This firmware is used on the following Keithley Instruments product models:

Model 2520 Pulsed Laser Diode Test System

FIRMWARE UPGRADE AND DOWNGRADE INSTRUCTIONS

Download the following from the Tektronix Support website (<https://www.tek.com/support>):

- Keithley Flash Wizard program (if you do not already have this).
 - Unzip the files in a folder of your choice and then run the "setup.exe" program.
 - Follow the instructions to install the program.
- The firmware revision image file you want to install on your Series 2700 instrument.

Perform the following steps to install the firmware revision onto the instrument:

1. Run the Flash Wizard program.
2. Select the appropriate interface at the Communications Select screen and follow any subsequent instructions.
3. The program should auto-detect the 2520.
4. You are asked to specify the firmware file.
5. The upgrade proceeds from there.

It typically only takes a few minutes using the GPIB interface.

Contact Keithley Instruments (<https://www.tek.com/keithley>) if you have any problems.

VERSION B11 RELEASE NOTES

OVERVIEW

Version B11 is a maintenance release of the 2520 firmware. This release includes one resolved issue and no enhancements.

RESOLVED ISSUES

Reference number:	PR-61827
Symptom:	RoHS hardware changes resulted in BIT failure rate to increase.
Resolution:	This issue has been corrected.

ENHANCEMENTS

There were no enhancements included in this release. See the “Resolved Issues” section for more information about release content.
