## General Information

---

### **Supported Models**

This firmware is used on the following Keithley products:

6220 and 6221.

Because this firmware is used on multiple models, this version of firmware may be available for use on one or more models while still being unqualified for use on the others. Please refer to the upgrade considerations section below for the product of interest for more details.

### **Installation Instructions**

Use Keithley Flash Wizard to install D03.

### **Upgrade considerations for all 6220 and 6221 models**

The following table lists the considerations that should be made when deciding whether to upgrade your 6220 or 6221 instrument firmware to version D03.

<b>Consideration for upgrade</b>	<b>From version Axx</b>	<b>From version D01 D02</b>
Recalibration required?	---	No
Backward compatibility concerns?	---	No
Requalification recommended?	---	No
Should you upgrade?	No	Review <sup>1</sup>

'A' versions of 6220 and 6221 such as A05 are incompatible with version D03 and should not be upgraded to any 'D' versions. Contact Keithley Instruments if you require upgrades.

---

<sup>1</sup> Review the entire list of changes made in all firmware versions between your current version and version D03. Upgrade if any of the fixes or enhancements are needed.

## D03 Release

---

### Overview

The D03 release was to correct the external-triggering operation of the Waveform output on the 6221. No enhancements took place.

## D02 Release

---

### Overview

The D02 release was to correct Built-in-test 102.1 on the 6221. No enhancements or bug fixes took place.

## D01 Release

---

### Overview

The D01 release was to support new Ethernet hardware on the 6221 and to support new flash devices on both models. No enhancements or fixes took place.

## A05 Release

---

### Overview

#### Critical Fixes

PR32266 **Models Affected:**

6221

**Symptom:**

:SOUR:PDEL:SWE ON command causes syntax error

**Resolution:**

Fixed :SOUR:PDEL:SWEep command to accept ON or OFF as arguments. Previously only took 1 or 0 as arguments.

PR32952 **Models Affected:**

6220, 6221

**Symptom:**

:SOUR:LIST:COMP:APP command does not append compliance values correctly.

**Resolution:**

Fixed :SOUR:LIST:COMP:APP command so that compliance values are appended.

PR27279 **Models Affected:**

6221

**Symptom:**

Selecting wave duration in cycles as an option does not show up correctly when re-entering the menu; it will show SET-TIME instead of SET-CYCLES unless the number of cycles is entered.

**Resolution:**

Fixed menu so that the menu option is displayed correctly, even if the number of cycles is left at default.

**Enhancements**

No enhancements have been made.

**Known Issues**

No known issues.
